

We are a full service custom fabricator utilizing the best in materials and our skilled labor force, in creating the highest fabrication standards in stainless steel, millwork, refrigeration and stonework food service equipment.

Our standard fabrication features include:

- 14 gauge tops utilizing type 304 stainless steel with a #4 finish.
- All field joints are blended as one continuous surface.
- Solid channeling: length and width of top and under-shelving to insure strong weight support.
- Various forms of edges to meet field requirements.
- All under-shelves and cross-rails are welded to the legs with all welds firmly polished out.

We have many years of experience in the industry and strive to be the best, hands down. From interpersonal relationships with our customers to quality and performance that keeps our clients coming back with the highest level of satisfaction attainable. All of our products are custom made to specs with the highest attention of detail and accessibility options.

Serving counters, buffets, beverage counters, salad bars, hot/cold food bars and displays, waitress stations, cabinets, stainless steel shelving and much more.
